## HAS NO QUARREL WITH GEN. VILLA

Gen. Felipe Angeles Characterizes as Absurd Story of Break With Leader.

**COMES TO WASHINGTON** ON A SPECIAL MISSION

Denies He Contemplated Alliance With Huerta-Reports of Critical Situation in Mexico City.

Gen. Felipe Angeles, for the past two years known as the closest associate and adviser of Gen. Francisco Villa in the Mexico apart, arrived in Washington tothe stories that after a quarrel he had pany with Gen. Villa.

Gen. Angeles received a representative se which have been occupied for me time by Enrique C. Llorente, condential agent at Washington of Gen. Villa, and characterized as absurd the been in negotiation with Huerta ympathizers of the old regime in Mexco, with whom Huerta stands.

Gen. Angeles' first call in Washington was at the War Department, where, accompanied by Mr. Llorente, he entered upon a conference with Brig. Gen. Scott, chief of staff of the army. Gen. Scott and Gen. Angeles are old friends, and Gen. Scott also is intimately acquainted with Gen. Villa, as well as possessing an intimate knowledge of Maylean agains by reason of his least

After the conference Gen. Scott told newspaper men that Gen. Angeles would rejoin Gen. Villa in Mexico. Gen. Angeles did not refer to the arrest of Gen. Huerta and his adherents at El Paso, nor did he discuss at length the military situation in central Mexico. Gen. Scott said the discussion was more of a general review of the situation in Mexico and a description of some of Gen. Angeles' experiences. The conference lasted more than two hours. In the past Gen. Villa has frequently consulted with Gen. Scott in relation to military affairs on the border when Gen. Scott was there.

Conditions in Mexico City.

Interest in Gen. Angeles' arrival in Washington was divided with information from Mexico City, delayed, by way of Vera Crus, to the effect that the diplomatic corps in Mexico City is taking steps to protect non-combatants of all nationalities in the event of fight-

of all nationalities in the event of fight-ing within Mexico City between the Zapata forces and the army sent against him under Gen. Gonzales by

Zapata combination

Zapata combination.

For practically six days now the City of Mexico has been cut off from communication with the outside world by telegraph. The latest news came to Vera Cruz by courier and described conditions at Mexico City as extremely critical. The advices said that the Zapatistas had defeated Gen. Gonzales and had taken from him much agents.

Zapatistas had defeated Gen. Gonzales and had taken from him much ammunition and other military supplies. Business has been suspended, and theze has been a food shortage. An effort has been made to remove foreigners from the danger zone, and the British charge d'affaires has been trying to establish a courier service between Mexico City and Vera Cruz. Information from Carranza sources at Vera Cruz is that United States citizens, fleeing from Mexico City, are beginning to arrive at the camp of Gonzales, which is southeast of the outskirts of Mexico City. What disposition is being made of them is not stated, but it is presumed that they will be assisted on to Vera Cruz.

Denies Alliance With Fuerts

### Denies Alliance With Huerta.

Discussing Mexican conditions today with a representative of The Star, Gen. Angeles said that he has no intention of calling at the State Department unless he is invited to do so. He characterized as absurd the report that he is connected in any way with Gen. Huerta's plans, these having resulted in the arrest at El Paso a few days ago of Gen. Huerta, Gen. Orozco and

in 'ne arrest at En raso a gew days ago of Gen. Huerta, Gen. Orozco and others.

Mr. Llorente acted as interpreter for Gen. Angeles, the latter understanding the English language better than he speaks it. It was announced that Gen. Angeles will make public a statement this afternoon, in which he will go into details as to the stories with which his name has been connected at various has been connected at various

name has been connected at various times recently.

So far from true are reports that the United States government has found it necessary to put a watch of secret service agents on Gen. Angeles that friends of his said today that a meeting is being arranged between A. Bruce Bielaski, chief of the division of information of the Department of Justice, and Gen. Angeles, at which Gen. Angeles will furnish the department with any information in his possession as to Mexican affairs.

Angeles' mission to Washington Gen. Angeles' mission to Washington was today characterized by Mr. Liorente as "a military one," it being understood that it will have to do with military affairs of concern to Gen. Villa. Aside from that, it has been the desire of Gen. Angeles' friends that he should visit Washington and here resulted in person the stories that have been told of his disloyalty to Gen. Villa.

Expresses Indignation. Gen. Angeles is indignant at these stories. He is known throughout Mex-ico as being what is called a "square man." He is educated, a man of the world, and of the highest type of Mexcan. He is one of the few Mexican engaged in recent affairs in that counwho have had the opportunity to try who have had the opportunity to acquire wealth, and who have not done so He is, in fact, his friends say, what is known as a poor man, although once possessed of wealth.

Very dark, because of the burning Mexican sunshine in which the famous general has conducted his campaigns, and apparently of middle age, Gen.

The court then announced that hexpected to leave for his vacation July expected to leave for his vacation July 1 and hoped to be able to read the voluminous record and inspect the numerous citations in time to act on the Riggs Bank matter before vacation. He now finds this will be utterly impossible, and so advised The Star's representative today that his decision will be deferred until after court convenes next October.

### Two Motions Submitted.

Two motions are under submission. One is by Secretary McAdoo, Treasurer Burke and Controller Williams to dismiss the suit for injunction instituted April 12 last by the Riggs National Bank to enjoin the retention of \$5,000 due the bank for interest on its bonds due the bank for interest on its bonds to secure circulation, and from covering this sum into the Treasury in payment of the fine alleged to have been unlawfully imposed by the controller. The officials claim the case is in reality against the United States and should be prosecuted, if at all, in the Court of Claims, and that an equity court lacks jurisdiction to pass on the question. The other motion is by the bank, asking the court to allow the preliminary injunction granted on the filing of the bill to remain in force until a final hearing of the controversy on its merits.

### Attorney Is Not Surprised.

Attorney Frank J. Despite the Austrian reinforcements long the whole frontier, the Italians entered the Austrian territory south of Riva, on the western side of Lake Garda, through the Nota VII passes, about 5,000 feet high; descended the precipitous cliffs of Carone mountain, over 8,000 feet high, entered the Legro valley, and reached the Ponale river, according to Brescia dispatches. The Ponale river runs for five-miles from Lake Legore, which has an altitude of 2,000 feet, to the shore of Lake Garda, whose altitude is 700 feet.

The Italians, it is reported, reached a spot near Bezzeca, where in 1866 the Garibaldians defeated the Austrians. Thus the Italians occupied part of the road, excavated in rock, uniting Riva with Storo and Brescia. This road was with Storo and Brescia. This road was finished in 1851 and is one of the best examples of its kind existing. On the mountains dominating this road, a short distance from Riva, Austria has constructed a whole system of fortifi-cations, the strongest being those on the Rocchetta and Oro peaks, which are some 5,000 feet high.

The work accomplished by the Italians in this region is described by the head of the French military mission as cyclopic. A special road has been built for the transportation of artillery to the peaks for the bombardment of Malberschett. Donkeys and mules were the peaks for the bombardment of Mar-borghetto. Attempt to Penetrate Enemy's Line in Southern Part of Russian Poland Proves Futile.

AUSTRIAN DRIVE CHECKED

LONDON, June 29.-The German official statement given out today by the German army headquarters staff announces that to the north of Lemberg the Austro-German forces are now on Russian territory.

Furthermore, Gen. von Linsingen has driven the Russians across the Gnila Lipa river, an affluent of the Dniester to the north of Halicz.

The result of the Austro-German operations northward from Lemberg was forecast to some extent in recent official reports from both sides, the Russian statements indicating continued retreat in that region, and the Austrian a continued advance impeded only by stubborn opposi-tion from the Russian rear guard.

The German report now states that the engagements in this territory have everywhere resulted in defeats for the Russians, who in one section were driven over the border, fighting being reported as far north as Tomaszow, in Russian Poland, which is about fifty miles northwest of Lemberg.

fecting the Russian center along the drawal of the Russians there to the Gnila Lipa river, to the eastward, it has been questioned by observers of both sides of the allies whether the Muscovite forces would hold very long the nection. the position taken along that river. The probability was suggested that their next determined stand for defense would be along the line of the River Bug. It is in that direction that the fighting at present is trending.

As evidence of a further retrograde movement, the pressure being exerted already has resulted in the Russians beginning to evacuate positions they have held in the Tanew section and along the lower San, the Germans declare.

Latest movements have strengthened the Austro-German lines, and have consolidated the hold of the Teutons on
the regained Galician capital.

The Teutonic sweep eastward along
that front is continuing, and the chief
question which the military experts are endeavoring to answer is how far it will extend before being halted by the next determined defensive stand on the part of the Russians.

Main Field of Action. With the line of the Dniester, north of Halicz, evacuated, stubborn rear guard actions are being fought by the retreating Russians to the north of Lemberg. Latest Austrian reports mention these operations at length and the Russian official statement ad-mits the continued advance of the Teu-

Gen. Ivanoff, commander of the southern armies, shows no trace of despondency. Discussing the present situation, the correspondent says:

"The view is held here that the capture of Lemberg and other Galician successes have brought the Austro-Germans no nearer a solution of the war. In spite of their enormous losses, which are estimated at 350,000 Germans and probably an equal number of Austrians, they still encounter the same stubborn army as before, which is willing to keep fighting for years if necessary.

#### Fruitless Fighting in West. Fruitless fighting sums up the opera-

tions along the western front, where even artillery duels lack vigor except on the line between Arras and the sea, where a bombardment of the positions where a bombardment of the positions in the expected detachment of German troops from the east front for operations in the west evidently has not yet occurred. This probably is due to the stubborn Russian retreat and the increasing pressure of the Italians.

On the western front the only important actions, according to the French report, consisted in the repulse of German attacks on the Calonne trench and near Metseral. On the other hand, Berlin claims that the French attacks at all points were repulsed.
